MEMORY FOAM MATTRESS

CORE:

* The core is made of an upper layer of 4 cm high-quality visco-elastic foam with unique thermo active qualities and a density of 85 kg/m³
* and a bearing surface of 10 cm cold foam CMHR with a density of 50-55 kg/m³
* The mattress responds to the body's heat and molds around you, relieving pressure points and improving circulation
* Suitable for people suffering from pressure sores (medium risk)
* Bacterium static treated against pathogenic and allergen micro organisms
* flexible and excellent pliability, suitable for electric hospital beds
* CRIB 5 fire resistant
* environmentally safe, CFK-free

FABRIC:

* Bi-elastic polyurethane coating
* The fabric responds to an optimal pressure division and small friction resistance
* Waterproof, breathable (water vapor permeable)
* Antibacterial, hypo-allergen
* washable at 95°C
* Resists current desinfectants
* removable with zipper (on short and long side)
* ecological
* CRIB 7 fire resistant
